

Rabbit anti-Mouse G-CSF mAb (DET)

Catalog No.: RMK0112

Basic Information

Catalog No.
RMK0112

Catagory
Elisa Antibody Kit

Application
ELISA

Product Information

Ig Type
Rabbit IgG

Purification
Affinity purification

Endotoxin Level

Storage
This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free.

Avoid repeated freeze-thaw cycles.

Formulation
Affinity purification

Background

Mouse granulocyte-colony stimulating factor (G-CSF) is a 24-25 kDa monomeric glycoprotein that regulates the proliferation, differentiation and activation of hematopoietic cells. Mouse G-CSF cDNA encodes a 208 amino acid (aa) precursor protein with a 30 aa signal sequence that is proteolytically cleaved to form a 178 aa O-glycosylated mature protein containing two intrachain disulfide bridges. In humans, two distinct cDNA clones, encoding a 204 aa form and a minor alternatively spliced 207 aa form of G-CSF precursors, have been isolated. Mouse and human G-CSF are 76% identical at the aa sequence level and the two proteins show species cross-reactivity. G-CSF is produced primarily by monocytes and macrophages upon activation by endotoxin, TNF- α or IL-1. Other cell types, including fibroblasts, endothelial cells, astrocytes and bone marrow stroma cells, can also secrete G-CSF after activation. In addition, various tumor cells express G-CSF constitutively.

Immunogen Information

Immunogen
Recombinant Mouse G-CSF

Cross-Reactivity

Assay Applications

Mouse G-CSF Sandwich ELISA Immunoassay

	Recommended Concentration	Sample
ELISA Capture	1-4ug/mL	Rabbit anti-Mouse G-CSF (CAP)(Cat. No.RMK0111)
ELISA Detection	0.008-0.033ug/mL	Rabbit anti-Mouse G-CSF (DET)(Cat. No.RMK0112)
Standard	7.8-500pg/mL	Recombinant Mouse G-CSF Protein
