Leader in Biomolecular Solutions for Life Science

ENSA Rabbit pAb

Catalog No.: A15665

Basic Information

Observed MW 13kDa

Calculated MW 13kDa

Category Primary antibody

Applications ELISA,WB

Cross-Reactivity Mouse

Background

The protein encoded by this gene belongs to a highly conserved cAMP-regulated phosphoprotein (ARPP) family. This protein was identified as an endogenous ligand for the sulfonylurea receptor, ABCC8/SUR1. ABCC8 is the regulatory subunit of the ATP-sensitive potassium (KATP) channel, which is located on the plasma membrane of pancreatic beta cells and plays a key role in the control of insulin release from pancreatic beta cells. This protein is thought to be an endogenous regulator of KATP channels. In vitro studies have demonstrated that this protein modulates insulin secretion through the interaction with KATP channel, and this gene has been proposed as a candidate gene for type 2 diabetes. At least eight alternatively spliced transcript variants encoding distinct isoforms have been observed.

Recommended Dilutions

1:500 - 1:2000

Immunogen Information

WB

Gene ID 2029

Swiss Prot 043768

Immunogen

A synthetic peptide corresponding to a sequence within amino acids 1-100 of human ENSA (NP_996929.1).

Synonyms

ARPP-19e; ENSA

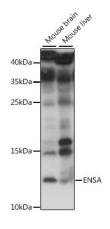

400-999-6126 <u>cn.market@abclonal.com.cn</u> <u>www.abclonal.com.cn</u>

Product Information

Source Rabbit **lsotype** IgG **Purification** Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.01% thimerosal,50% glycerol,pH7.3.

Western blot analysis of various lysates using ENSA Rabbit pAb (A15665) at 1:1000 dilution. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 10s.
