

CENPF Rabbit pAb

Catalog No.: A18644 **1 Publications**

Basic Information

Observed MW

330kDa

Calculated MW

358kDa

Category

Primary antibody

Applications

ELISA,WB

Cross-Reactivity

Human, Mouse

Background

This gene encodes a protein that associates with the centromere-kinetochore complex. The protein is a component of the nuclear matrix during the G2 phase of interphase. In late G2 the protein associates with the kinetochore and maintains this association through early anaphase. It localizes to the spindle midzone and the intracellular bridge in late anaphase and telophase, respectively, and is thought to be subsequently degraded. The localization of this protein suggests that it may play a role in chromosome segregation during mitosis. It is thought to form either a homodimer or heterodimer. Autoantibodies against this protein have been found in patients with cancer or graft versus host disease.

Recommended Dilutions

WB 1:500 - 1:1000

Immunogen Information

Gene ID

1063

Swiss Prot

P49454

Immunogen

Recombinant fusion protein containing a sequence corresponding to amino acids 1730-1890 of human CENPF (NP_057427.3).

Synonyms

CENF; hcp-1; CILD31; STROMS; PRO1779; CENPF

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.01% thimerosal, 50% glycerol, pH7.3.

Validation Data

Western blot analysis of HeLa, using CENPF Rabbit pAb (A18644) at 1:1000 dilution.
Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.
Lysates/proteins: 25µg per lane.
Blocking buffer: 3% nonfat dry milk in TBST.
Detection: ECL Basic Kit (RM00020).
Exposure time: 60s.
