

FZD2 Rabbit pAb

Catalog No.: A20421

Basic Information

Observed MW

Refer to figures

Calculated MW

64kDa

Category

Primary antibody

Applications

WB,ELISA

Cross-Reactivity

Human

Background

This intronless gene is a member of the frizzled gene family. Members of this family encode seven-transmembrane domain proteins that are receptors for the wingless type MMTV integration site family of signaling proteins. This gene encodes a protein that is coupled to the beta-catenin canonical signaling pathway. Competition between the wingless-type MMTV integration site family, member 3A and wingless-type MMTV integration site family, member 5A gene products for binding of this protein is thought to regulate the beta-catenin-dependent and -independent pathways.

Recommended Dilutions

WB 1:500 - 1:2000

ELISA Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements.

Immunogen Information

Gene ID

2535

Swiss Prot

Q14332

Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

Synonyms

Fz2; fz-2; fzE2; hFz2; OMOD2; FZD2

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.01% thimerosal, 50% glycerol, pH7.3.
