## Basic Information

### Observed MW

75kDa

### Calculated MW

90kDa

### Category

Primary antibody

### Applications

ELISA, WB

### Cross-Reactivity

Arabidopsis thaliana

## Background

Encodes a nuclear protein that acts in a phyB pathway (but downstream of phyB) and induces flowering in response to suboptimal light conditions. PFT1 promotes flowering in CO dependent and independent pathways and integrates several environmental stimuli, such as light quality and JA-dependent defenses. Mutants are hypo-responsive to far-red and hyper-responsive to red light and flower late under long day conditions. Also shown to be a Mediator subunit regulating jasmonate-dependent defense.
