APC Mouse anti-Human CD3 mAb

www.abclonal.com

ABclonal

Catalog No.: A22799

Basic Information

Observed MW

Refer to figures

Calculated MW

23kDa

Category

Primary antibody

Applications

FC

Cross-Reactivity

Human

CloneNo number

AMC0533

Conjugate

APC. Ex:650nm. Em:660nm.

Background

The protein encoded by this gene is the CD3-epsilon polypeptide, which together with CD3-gamma, -delta and -zeta, and the T-cell receptor alpha/beta and gamma/delta heterodimers, forms the T-cell receptor-CD3 complex. This complex plays an important role in coupling antigen recognition to several intracellular signal-transduction pathways. The genes encoding the epsilon, gamma and delta polypeptides are located in the same cluster on chromosome 11. The epsilon polypeptide plays an essential role in T-cell development. Defects in this gene cause immunodeficiency. This gene has also been linked to a susceptibility to type I diabetes in women.

Recommended Dilutions

FC

10 μL/Test

Immunogen Information

Gene ID916

Swiss Prot
P07766

Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

Synonyms

T3E; TCRE; IMD18; CD3epsilon

Product Information

SourceIsotypePurificationMouseIgG1Affinity purification

Storage

Store at 4°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.1% Proclin300,0.2% BSA,pH7.2.

Flow cytometry:1X10^6 Human PBMC were surface-stained with APC Mouse anti-Human CD3 mAb (A22799, orange line) or APC Mouse IgG1 isotype control mAb (A22879, blue line).
