

ABflo® 647 Rabbit anti-Human HLA-DR mAb

Catalog No.: A25080

Basic Information

Observed MW

Calculated MW
29kDa

Category
Primary antibody

Applications
FC

Cross-Reactivity
Human

CloneNo number
ARC5141-01-ABf647

Conjugate
ABflo® 647. Ex:648nm. Em:664nm.

Recommended Dilutions

FC 5 µl per 10⁶ cells in
100 µl volume

Background

HLA-DRA is one of the HLA class II alpha chain paralogues. This class II molecule is a heterodimer consisting of an alpha and a beta chain, both anchored in the membrane. This molecule is expressed on the surface of various antigen presenting cells such as B lymphocytes, dendritic cells, and monocytes/macrophages, and plays a central role in the immune system and response by presenting peptides derived from extracellular proteins, in particular, pathogen-derived peptides to T cells. The alpha chain is approximately 33-35 kDa and its gene contains 5 exons. Exon 1 encodes the leader peptide, exons 2 and 3 encode the two extracellular domains, and exon 4 encodes the transmembrane domain and the cytoplasmic tail. DRA does not have polymorphisms in the peptide binding part and acts as the sole alpha chain for DRB1, DRB3, DRB4 and DRB5.

Immunogen Information

Gene ID 3122	Swiss Prot P01903
------------------------	-----------------------------

Immunogen
Recombinant protein of human HLA-DRA.

Synonyms
HLA-DRA1

Product Information

Source Rabbit	Isotype IgG	Purification Affinity purification
-------------------------	-----------------------	--

Storage
Store at 2-8°C. Avoid freeze.
Buffer: PBS with 0.03% proclin300,0.2% BSA,pH7.3.

Validation Data

Flow cytometry: 1X10⁶ PC-3 cells (negative control, left) and U-87 MG cells (right) were surface-stained with ABflo® 647 Rabbit anti-Human HLA-DR mAb (A25080, 5 µl/Test, orange line) or ABflo® 647 Rabbit IgG isotype control (A22070, 5 µl/Test, blue line). Non-fluorescently stained cells were used as blank control (red line).
