APC Mouse anti-Human CD3 mAb

www.abclonal.com

ABclonal

Catalog No.: A25082

Basic Information

Observed MW

Calculated MW

23kDa

Category

Primary antibody

Applications

ГC

Cross-Reactivity

Human

CloneNo number

AMC50002

Conjugate

APC. Ex:650nm. Em:660nm.

Background

The protein encoded by this gene is the CD3-epsilon polypeptide, which together with CD3-gamma, -delta and -zeta, and the T-cell receptor alpha/beta and gamma/delta heterodimers, forms the T-cell receptor-CD3 complex. This complex plays an important role in coupling antigen recognition to several intracellular signal-transduction pathways. The genes encoding the epsilon, gamma and delta polypeptides are located in the same cluster on chromosome 11. The epsilon polypeptide plays an essential role in T-cell development. Defects in this gene cause immunodeficiency. This gene has also been linked to a susceptibility to type I diabetes in women.

Recommended Dilutions

FC

5 μ l per 10^6 cells in 100 μ l volume

Immunogen Information

Gene ID 916 **Swiss Prot**

P07766

Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

Synonyms

T3E; TCRE; IMD18; CD3epsilon

Product Information

SourceIsotypePurificationMousemouse IgG2aAffinity purification

Storage

Store at 2-8°C. Avoid freeze.

Buffer: PBS with 0.09% sodium azide, 0.2% BSA, pH7.3.

Validation Data

Flow cytometry: 1X10^6 Raji cells (negative control,left) and Human PBMC (right) were surface-stained with APC Mouse anti-Human CD3 mAb (A25082,5 μ I/Test,orange line)or Mouse IgG 2a isotype control (5 μ I/Test,blue line). Non-fluorescently stained cells were used as blank control (red line).

Flow cytometry: $1X10^6$ PBMC were surfacestained with Mouse IgG 2a isotype control (5 μ I/Test,Ieft) or APC Mouse anti-Human CD3 mAb (A25082,5 μ I/Test,right).
