ASGR1 Rabbit mAb

Catalog No.: A30150 Recombinant

Basic Information

Observed MW
40-50 kDa

Calculated MW
33 KDa

Category
Primary antibody

Applications
WB,IF-F,IF-P,IHC-P

Cross-Reactivity
Human, Rat

CloneNo number
ARC85070

Background

This gene encodes a subunit of the asialoglycoprotein receptor. This receptor is a transmembrane protein that plays a critical role in serum glycoprotein homeostasis by mediating the endocytosis and lysosomal degradation of glycoproteins with exposed terminal galactose or N-acetylgalactosamine residues. The asialoglycoprotein receptor may facilitate hepatic infection by multiple viruses including hepatitis B, and is also a target for liver-specific drug delivery. The asialoglycoprotein receptor is a hetero-oligomeric protein composed of major and minor subunits, which are encoded by different genes. The protein encoded by this gene is the more abundant major subunit. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Jan 2011]

Recommended Dilutions

Immunogen Information

Gene ID
432

Swiss Prot
P07306

Immunogen
Recombinant protein (or fragment).This information is considered to be commercially sensitive.

Synonyms
HL-1; ASGPR; ASGPR1; CLEC4H1

Contact

400-999-6126

Product Information

Source
Rabbit

Isotype
IgG

Purification
Affinity purification

Storage
Store at -20℃. Avoid freeze / thaw cycles
