NFATC3 Rabbit pAb

Catalog No.: A6666 **4 Publications**

Basic Information

Observed MW
150 kDa

Calculated MW
116 kDa

Category
Primary antibody

Applications
WB,IHC-P,ELISA

Cross-Reactivity
Human

Background

The product of this gene is a member of the nuclear factors of activated T cells DNA-binding transcription complex. This complex consists of at least two components: a preexisting cytosolic component that translocates to the nucleus upon T cell receptor (TCR) stimulation and an inducible nuclear component. Other members of this family participate to form this complex also. The product of this gene plays a role in the regulation of gene expression in T cells and immature thymocytes. Several transcript variants encoding distinct isoforms have been identified for this gene.

Recommended Dilutions

WB	1:500 - 1:2000
IHC-P	1:50 - 1:200
ELISA	Recommended starting concentration is 1 μg/mL. Please optimize the concentration based on your specific assay requirements.

Immunogen Information

Gene ID
4775

Swiss Prot
Q12968

Immunogen
Recombinant protein (or fragment).This information is considered to be commercially sensitive.

Synonyms
NFAT4; NFATX; NF-AT4c; n339260; NFATC3

Contact

400-999-6126

cn.market@abclonal.com.cn

Product Information

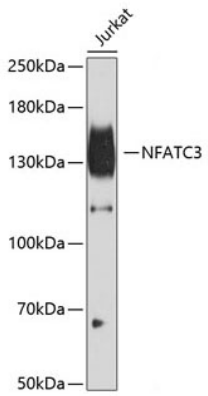

Source
Rabbit

Isotype
IgG

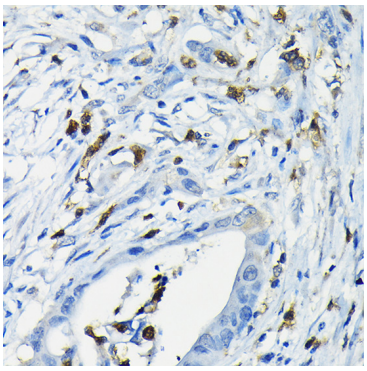

Purification
Affinity purification

Storage
Store at -20℃

Validation Data

Western blot analysis of various lysates using NFATC3 Rabbit pAb (A6666) at 1:500 dilution.
Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.
Lysates/proteins: 25µg per lane.
Blocking buffer: 3% nonfat dry milk in TBST.
Detection: ECL Basic Kit (RM00020).
Exposure time: 10s.

Immunohistochemistry analysis of paraffin-embedded Human colon carcinoma using NFATC3 Rabbit pAb (A6666) at dilution of 1:200 (40x lens). High pressure antigen retrieval performed with 0.01M Citrate buffer (pH 6.0) prior to IHC staining.
