

# Mouse anti Strep II-Tag mAb

Catalog No.: AE066

22 Publications

## Basic Information

### Observed MW

32kDa

### Calculated MW

### Category

Tag antibody

### Applications

WB,ELISA

### Cross-Reactivity

Species independent

### CloneNo number

AMC0521

## Background

Protein tags are peptide sequences genetically grafted onto a recombinant protein. Often these tags are removable by chemical agents or by enzymatic means, such as proteolysis or intein splicing. Tags are attached to proteins for various purposes. Epitope tags are short peptide sequences which are chosen because high-affinity antibodies can be reliably produced in many different species. These are usually derived from viral genes, which explain their high immunoreactivity. Epitope tags include V5-tag, Myc-tag, HA-tag and NE-tag. These tags are particularly useful for western blotting, immunofluorescence and immunoprecipitation experiments, although they also find use in antibody purification.

## Recommended Dilutions

**WB** 1:2000 - 1:5000

**ELISA** Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements.

## Immunogen Information

### Gene ID

### Swiss Prot

### Immunogen

A synthetic peptide corresponding to Strep II tag.

### Synonyms

Strep II;Strep II tag;Strep II-tag

## Contact

## Product Information

### Source

Mouse

### Isotype

IgG1,Kappa

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.02% sodium azide,50% glycerol,pH7.3.

## Validation Data

---

Western blot analysis of over-expressed Strep II-tagged protein in 293T cells using Mouse anti Strep II-Tag mAb (AE066). Secondary antibody: HRP-conjugated Goat anti-Mouse IgG (H+L) (AS003) at 1:10000 dilution.
