

# Myc-Tag Rabbit mAb

Catalog No.: AE070 **Recombinant** **104 Publications**

## Basic Information

### Observed MW

58 kDa (NLK transfected)

### Calculated MW

### Category

Tag antibody

### Applications

WB,IF/ICC,IP,ELISA

### Cross-Reactivity

Species independent

### CloneNo number

ARC5004-12

## Background

Protein tags are peptide sequences genetically grafted onto a recombinant protein. Often these tags are removable by chemical agents or by enzymatic means, such as proteolysis or intein splicing. Tags are attached to proteins for various purposes. Epitope tags are short peptide sequences which are chosen because high-affinity antibodies can be reliably produced in many different species. These are usually derived from viral genes, which explain their high immunoreactivity. Epitope tags include V5-tag, Myc-tag, HA-tag and NE-tag. These tags are particularly useful for western blotting, immunofluorescence and immunoprecipitation experiments, although they also find use in antibody purification.

## Recommended Dilutions

**WB** 1:10000 - 1:120000

**IF/ICC** 1:200 - 1:1000

**IP** 0.5µg-4µg antibody for  
200µg-400µg extracts of  
whole cells

**ELISA** Recommended starting  
concentration is 1 µg/mL.  
Please optimize the  
concentration based on  
your specific assay  
requirements.

## Immunogen Information

### Gene ID

### Swiss Prot

### Immunogen

Synthetic peptide. This information is considered to be commercially sensitive.

### Synonyms

Myc; Myc tag; Myc-tag; Myc-Tag

## Product Information

### Source

Rabbit

### Isotype

IgG

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS containing 50% glycerol and 0.05% BSA, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3.

## Validation Data

Immunoprecipitation analysis of 200 ug extracts of 293T cells transfected with NLK expression vector containing a Myc-Tag Rabbit mAb (AE070). Western blot was performed from the immunoprecipitate using Myc-Tag Rabbit mAb at 1:1000 dilution.

Western blot analysis of lysates from wild type (WT) and 293T cells transfected with using NLK-Myc-Tag Rabbit mAb (AE070) at 1:120000 dilution.  
Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution.  
Lysates/proteins: 25 µg per lane.  
Blocking buffer: 3% nonfat dry milk in TBST.  
Detection: ECL Basic Kit (RM00020).  
Exposure time: 10 s.

Confocal imaging of HeLa cells transfected with H2B-EGFP-Myc using Myc-Tag Rabbit mAb (AE070, dilution 1:200) followed by a further incubation with Cy3-conjugated Goat Anti-Rabbit IgG (H+L) (AS007, dilution 1:500) (Red). DAPI was used for nuclear staining (Blue). Objective: 100x.
