Leader in Biomolecular Solutions for Life Science

HRP-conjugated Rabbit anti HA-Tag mAb

Catalog No.: AE123

Basic Information

Observed MW 53kDa

Calculated MW

Category Tag antibody

Applications WB

Cross-Reactivity Species independent

CloneNo number ARC59578-HRP

Conjugate HRP

Recommended Dilutions

1:10000 - 1:70000

WB

Background

these tags are removable by chemical agents or by enzymatic means, such as proteolysis or intein splicing. Tags are attached to proteins for various purposes. Epitope tags are short peptide sequences which are chosen because high-affinity antibodies can be reliably produced in many different species. These are usually derived from viral genes, which explain their high immunoreactivity. Epitope tags include V5-tag, Myc-tag, HA-tag and NEtag. These tags are particularly useful for western blotting, immunofluorescence and immunoprecipitation experiments, although they also find use in antibody purification.

Protein tags are peptide sequences genetically grafted onto a recombinant protein. Often

Immunogen Information

Gene ID

Swiss Prot

Immunogen

Synthetic peptide. This information is considered to be commercially sensitive.

Synonyms

HA; HA tag; HA-tag; HA-Tag

Product Information

Source Rabbit

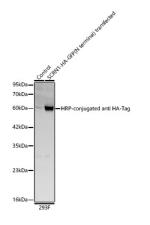

Isotype lgG

Purification Affinity purification

Storage

Store at -20°C. Avoid freeze.

Buffer: PBS containing 50% glycerol and 0.2% BSA, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3.

Western blot analysis of lysates from wild type (WT) and 293F cells transfected with SCRN1-HA-GFP(N terminal) using HRP-conjugated Rabbit anti HA-Tag mAb(AE123) at 1:10000 dilution. Lysates/proteins: 30 µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 5s.
