

# Phospho-Bad-S136 Rabbit pAb

Catalog No.: AP0011 **1 Publications**

## Basic Information

### Observed MW

Refer to figures

### Calculated MW

18kDa

### Category

Primary antibody

### Applications

ELISA, WB

### Cross-Reactivity

Human

## Background

The protein encoded by this gene is a member of the BCL-2 family. BCL-2 family members are known to be regulators of programmed cell death. This protein positively regulates cell apoptosis by forming heterodimers with BCL-xL (B-cell lymphoma-extra large) and BCL-2, and reversing their death repressor activity. Proapoptotic activity of this protein is regulated through its phosphorylation. Protein kinases AKT and MAP kinase, as well as protein phosphatase calcineurin were found to be involved in the regulation of this protein. Alternative splicing of this gene results in two transcript variants which encode the same isoform.

## Recommended Dilutions

WB 1:500 - 1:2000

## Immunogen Information

### Gene ID

572

### Swiss Prot

Q92934

### Immunogen

A synthetic phosphorylated peptide around S136 of mouse Bad (NP\_031548.1?).

### Synonyms

BBC2; BCL2L8; Phospho-Bad-S136

## Product Information

### Source

Rabbit

### Isotype

IgG

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH 7.3.
