

Phospho-c-Jun-S63 Rabbit mAb

Catalog No.: AP0105 **Recombinant** **12 Publications**

Basic Information

Observed MW

48 kDa

Calculated MW

36 kDa

Category

Primary antibody

Applications

WB, IF/ICC, ELISA

Cross-Reactivity

Human, Mouse, Rat

Clone/No. number

ARC0051

Background

This gene is the putative transforming gene of avian sarcoma virus 17. It encodes a protein which is highly similar to the viral protein, and which interacts directly with specific target DNA sequences to regulate gene expression. This gene is intronless and is mapped to 1p32-p31, a chromosomal region involved in both translocations and deletions in human malignancies.

Recommended Dilutions

WB 1:1000 - 1:10000

IF/ICC 1:50 - 1:200

ELISA Recommended starting concentration is 1 μ g/mL.
Please optimize the concentration based on your specific assay requirements.

Immunogen Information

Gene ID

3725

Swiss Prot

P05412

Immunogen

Synthetic peptide. This information is considered to be commercially sensitive.

Synonyms

AP1; p39; AP-1; cJUN; c-Jun; Phospho-c-Jun-S63

Product Information

Source

Rabbit

Isotype

IgG

Purification

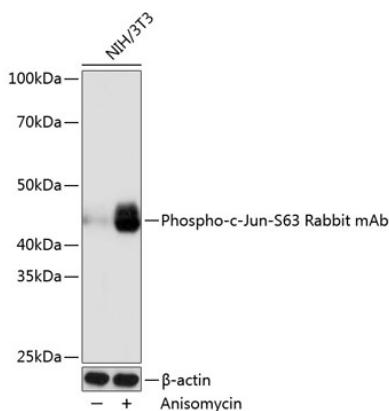

Affinity purification

Storage

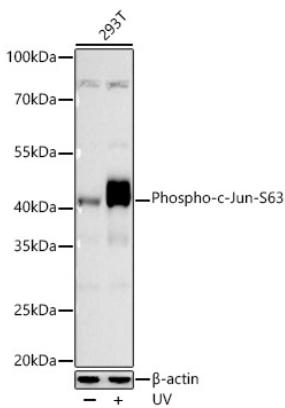

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS containing 50% glycerol and 0.05% BSA, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3.

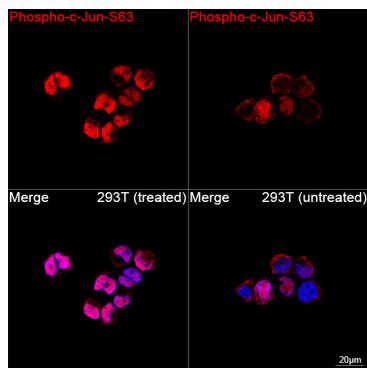

Validation Data

Western blot analysis of lysates from NIH/3T3 cells, using Phospho-c-Jun-S63 Rabbit mAb (AP0105) at 1:1000 dilution. NIH/3T3 cells were treated with Anisomycin (25 µg/mL) at 37°C for 30 minutes. Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 25µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 1s.

Western blot analysis of lysates from 293T cells using Phospho-c-Jun-S63 Rabbit mAb (AP0105) at 1:10000 dilution incubated overnight at 4°C. 293T cells were treated with UV (100 mJ/cm²) at room temperature and recovered for 2 hours. Secondary antibody: HRP-conjugated Goat anti-Rabbit IgG (H+L) (AS014) at 1:10000 dilution. Lysates/proteins: 30 µg per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020). Exposure time: 45 s.

Confocal imaging of 293T cells (treated with Anisomycin) and 293T cells (untreated) using Phospho-c-Jun-S63 Rabbit mAb (AP0105, dilution 1:200) followed by a further incubation with Cy3 Goat Anti-Rabbit IgG (H+L) (AS007, dilution 1:500) (Red). DAPI was used for nuclear staining (Blue). Objective: 100x.
