

# HRP-conjugated Donkey anti-Rabbit IgG (H+L)

Catalog No.: AS038 **13 Publications**

## Basic Information

### Observed MW

42kDa

### Calculated MW

### Category

Secondary antibody

### Applications

WB,IHC-P

### Cross-Reactivity

### Conjugate

HRP

## Background

Secondary antibodies are affinity-purified antibodies which will work with target-specific primary antibody in the detection, sorting or purification of its specified target. Secondary antibodies offer increased versatility enabling users to use many detection systems (e.g. HRP, AP, fluorescence). They can also provide greater sensitivity through signal amplification as multiple secondary antibodies. Most commonly, secondary antibodies are generated by immunizing the host animal (different from host species of primary antibody) with a pooled population of normal immunoglobulins from the host species of primary antibody and can be further purified and modified (i.e. antibody fragmentation, label conjugation, etc.) to ensure well-characterized specificity to corresponding normal immunoglobulins.

## Recommended Dilutions

<b>WB</b>	1:5000 - 1:100000
<b>IHC-P</b>	1:50 - 1:200

## Immunogen Information

### Gene ID

### Swiss Prot

### Immunogen

Rabbit IgG

## Product Information

### Source

Donkey

### Isotype

Horseradish peroxidase  
conjugated IgG

### Purification

Affinity purification

### Storage

Store at -20°C. Avoid freeze / thaw cycles.  
Buffer: PBS with 0.75% BSA,50% glycerol,pH7.3.

## Validation Data

Western blot analysis of lysates from HeLa cells, using  $\beta$ -actin antibody as the primary antibody.  
Secondary antibody: HRP Donkey Anti-Rabbit IgG (H+L) antibody (AS038) at 1:2000-1:30000 dilution  
Lysates/proteins: 25 $\mu$ g per lane.  
Blocking buffer: 3% nonfat dry milk in TBST.  
Detection: ECL Basic Kit (RM00020).  
Exposure time: 30s.

Immunohistochemistry analysis of paraffin-embedded Human liver (primary antibody is acox1) using HRP Donkey Anti-Rabbit IgG (H+L) (AS038) at dilution of 1:100 (40x lens). High pressure antigen retrieval performed with 0.01M Citrate Bufferr (pH 6.0) prior to IHC staining.

Immunohistochemistry analysis of paraffin-embedded Human liver (the primary antibody is acox1, And the control secondary antibody is stained) using HRP Donkey Anti-Rabbit IgG (H+L) (AS038) at dilution of 1:100 (40x lens). High pressure antigen retrieval performed with 0.01M Citrate Bufferr (pH 6.0) prior to IHC staining.
