# Rabbit Anti-Goat IgG (H+L)

Catalog No.: AS081 1 Publications

## **Basic Information**

#### **Observed MW**

25kDa(Light chain),55kDa(Heavy chain)

#### **Calculated MW**

## Category

Secondary antibody

## **Applications**

WB

## **Cross-Reactivity**

## **Background**

Secondary antibodies are affinity-purified antibodies which will work with target-specific primary antibody in the detection, sorting or purification of its specified target. Secondary antibodies offer increased versatility enabling users to use many detection systems (e.g. HRP, AP, fluorescence). They can also provide greater sensitivity through signal amplification as multiple secondary antibodies . Most commonly, secondary antibodies are generated by immunizing the host animal (different from host species of primary antibody) with a pooled population of normal immunoglobulins from the host species of primary antibody and can be further purified and modified (i.e. antibody fragmentation, label conjugation, etc.) to ensure well-characterized specificity to corresponding normal immunoglobulins.

**Swiss Prot** 

## **Recommended Dilutions**

WB

1:500 - 1:1000

# Immunogen Information

#### Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS containing 50% glycerol, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3.

Western blot analysis of Goat IgG using Rabbit Anti-Goat IgG (H+L) (AS081) at 1:1000 dilution.

Lysates/proteins: 5 ng - 10 ng per lane. Blocking buffer: 3% nonfat dry milk in TBST. Detection: ECL Basic Kit (RM00020).

Exposure time: 60s.
