HRP conjugated Rabbit Anti-Mouse IgG2b (Fc) mAb

Background

gamma 3 (G3m marker)).

ABclomal[®]

Catalog No.: AS123 1 Publications

Basic Information

Observed MW Refer to figures

Calculated MW 37kDa

Category Secondary antibody

Applications ELISA

Cross-Reactivity Mouse

CloneNo number ARC67788-HRP

Conjugate HRP

Recommended Dilutions

1:5000-1:10000

Immunogen Information

ELISA

Gene ID 16016 Swiss Prot P01867-2

Enables antigen binding activity. Acts upstream of or within phagocytosis; positive regulation of immune response; and positive regulation of phagocytosis. Located in extracellular space.

Part of immunoglobulin complex, circulating. Orthologous to several human genes including IGHG1 (immunoglobulin heavy constant gamma 1 (G1m marker)); IGHG2 (immunoglobulin

heavy constant gamma 2 (G2m marker)); and IGHG3 (immunoglobulin heavy constant

Immunogen

Synthetic peptide. This information is considered to be commercially sensitive.

Synonyms

lgG2b; lgh-3; gamma2b

Product Information

Source Rabbit **lsotype** lgG **Purification** Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles. Buffer: PBS with 0.09% Sodium azide,0.05% BSA,50% glycerol,pH7.3. Affinity of Rabbit Anti-Mouse IgG2b (Fc) mAb, HRP conjugated

Dose response curve of HRP conjugated Rabbit Anti-Mouse IgG2b (Fc) mAb measured by ELISA. 1 µg/mL of various immunoglobulins were coated to 384-well plate., blank wells without protein were used as negative control (NC). The coated plate was blocked and subsequently incubated with 25 μL of HRP conjugated Rabbit Anti-Mouse IgG2b (Fc) mAb in a 2 fold serial dilution from 2 μ g/mL to 6.1*10^-5 pg/mL, incubation was performed at room temperature for 1 hour. The ELISA result demonstrated that Rabbit Rabbit Anti-Mouse IgG2b (Fc) has highly specific recognition of Mouse IgG2b while no or minimal cross reactivity to Mouse IgG1[]Mouse IgG2a[Mouse IgG2c]Mouse IgG3[Mouse IgM] Mouse IgE Mouse IgD Rat IgG Human IgG.
