

HRP conjugated Rabbit Anti-Human IgG2 (Fc) mAb

Catalog No.: AS125

Basic Information

Observed MW

Refer to figures

Calculated MW

Category

Secondary antibody

Applications

ELISA

Cross-Reactivity

CloneNo number

ARC68765-HRP

Conjugate

HRP

Background

Predicted to enable antigen binding activity and immunoglobulin receptor binding activity. Predicted to be involved in several processes, including activation of immune response; defense response to other organism; and phagocytosis. Located in extracellular space.

Recommended Dilutions

ELISA 1:5000-1:10000

Immunogen Information

Gene ID

3501

Swiss Prot

P01859

Immunogen

Recombinant protein (or fragment). This information is considered to be commercially sensitive.

Synonyms

IgG2

Product Information

Source

Rabbit

Isotype

IgG

Purification

Affinity purification

Storage

Store at -20°C. Avoid freeze / thaw cycles.

Buffer: PBS containing 50% glycerol and 0.05% BSA, preserved with proclin300 or sodium azide (as specified on the Certificate of Analysis), pH 7.3.

Dose response curve of HRP conjugated Rabbit Anti-Human IgG2 (Fc) mAb measured by ELISA. 1 $\mu\text{g/mL}$ of various immunoglobulins were coated to 384-well plate., blank wells without protein were used as negative control (NC). The coated plate was blocked and subsequently incubated with 25 μL of HRP conjugated Rabbit Anti-Human IgG2 (Fc) mAb in a 2 fold serial dilution from 2 $\mu\text{g/mL}$ to 6.1×10^{-5} pg/mL , incubation was performed at room temperature for 1 hour. The ELISA result demonstrated that Rabbit Anti-Human IgG2 (Fc) has highly specific recognition of Human IgG while no or minimal cross reactivity to Human IgG1 Human IgG4 Human IgM Rat IgG.
