Product Information

Description
MKI67 Knockout HeLa Cell Line is engineered from HeLa cell line with Gene-Editing technology.
Allele-1:101bp deletion in exon7
Allele-2:101bp deletion in exon7
Mammalian cells such as human, rat and mouse cells are normally diploid with two alleles. Homozygote: both alleles were knocked out, mRNA has no signal, no expression of proteins. Heterozygote: only one allele was knocked out, the mRNA transcript levels was decreased compared to wild type, and the protein expression levels was also lower than that of the wild type.
