

Rabbit anti-Human IL-1 β mAb (DET)

Catalog No.: RM17734

Basic Information

Catalog No.
RM17734

Category
Elisa Antibody Kit

Application
ELISA

Product Information

Ig Type
Rabbit IgG

Purification
Affinity purification

Endotoxin Level

Storage
Store at -20°C. Avoid freeze / thaw cycles. Preservative 0.05%ProClin 300.
Avoid repeated freeze-thaw cycles.

Formulation
Supplied as a 0.2um filtered solution in PBS with 0.1%Braveds MB-1,PH 7.4.

Background

The protein encoded by this gene is a member of the interleukin 1 cytokine family. This cytokine is produced by activated macrophages as a proprotein, which is proteolytically processed to its active form by caspase 1 (CASP1/ICE). This cytokine is an important mediator of the inflammatory response, and is involved in a variety of cellular activities, including cell proliferation, differentiation, and apoptosis. The induction of cyclooxygenase-2 (PTGS2/COX2) by this cytokine in the central nervous system (CNS) is found to contribute to inflammatory pain hypersensitivity. Similarly, IL-1B has been implicated in human osteoarthritis pathogenesis. Patients with severe Coronavirus Disease 2019 (COVID-19) present elevated levels of pro-inflammatory cytokines such as IL-1B in bronchial alveolar lavage fluid samples. The lung damage induced by the Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is to a large extent, a result of the inflammatory response promoted by cytokines such as IL-1B. This gene and eight other interleukin 1 ...

Immunogen Information

Immunogen
Recombinant IL-1 β Protein

Cross-Reactivity

No cross-reactivity in ELISA assay with recombinant hIL-1A \square hIL-1RA \square hIL-18 \square hIL-33 \square mL-1B \square mL-33 \square rIL-1A \square rIL-1B

Assay Applications

Human IL-1 β Sanwich ELISA Immunoassay

	Recommended Concentration	Sample
ELISA Capture	0.5-2ug/mL	Rabbit anti-Human IL-1 β (CAP)(Cat. No.RM17733)
ELISA Detection	0.05-0.2ug/mL	Rabbit anti-Human IL-1 β (DET)(Cat. No.RM17734)
Standard	7.81-500pg/mL	Recombinant Human IL-1 β Protein

Validation Data

Placed at 37°C for 3 days, the stability of the standard curve all conform to CV <10%.

This standard curve is only for demonstration purposes. A standard curve should be generated for each assay.

No significant cross-reactivity or interference was observed.

No significant cross-reactivity or interference was observed.
