Rabbit anti-Human IgM mAb(CAP)

Catalog No.: RMK0103

Basic Information

Catalog No.
RMK0103

Catagory
Elisa Antibody Kit

Application
ELISA

Product Information

Ig Type
Rabbit IgG

Purification
Affinity purification

Endotoxin Level

Storage
Store at -20℃
Avoid repeated freeze-thaw cycles.

Formulation
Supplied as a 0.2um filtered solution in PBS with 0.05%ProClin 300,PH 7.4.

Background

Immunoglobulins (Ig) are the antigen recognition molecules of B cells. An Ig molecule is made up of 2 identical heavy chains and 2 identical light chains (see MIM 147200) joined by disulfide bonds so that each heavy chain is linked to a light chain and the 2 heavy chains are linked together. Each Ig heavy chain has an N-terminal variable (V) region containing the antigen-binding site and a C-terminal constant (C) region, encoded by an individual C region gene, that determines the isotype of the antibody and provides effector or signaling functions. The heavy chain V region is encoded by 1 each of 3 types of genes: V genes (see MIM 147070), joining (J) genes (see MIM 147010), and diversity (D) genes (see MIM 146910). The C region genes are clustered downstream of the V region genes within the heavy chain locus on chromosome 14. The IGHM gene encodes the C region of the mu heavy chain, which defines the IgM isotype. Naive B cells express the transmembrane forms of IgM and IgD (see IGHD; MIM 1471770) on their surface. During an antibody ...

Immunogen Information

Immunogen
Native Human IgM

Cross-Reactivity

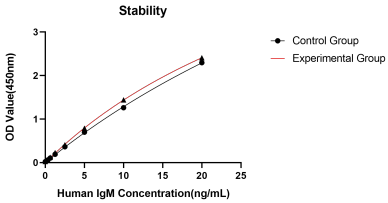

No cross-reactivity in ELISA assay withrecombinant M.IgM,R.IgM,M.IgE,R.IgA

Assay Applications

Human IgM Sandwich ELISA Immunoassay

	Recommended Concentration	Sample
ELISA Capture	1-4ug/mL	Rabbit anti-Human IgM mAb(CAP)(Cat. No.RMK0103)
ELISA Detection	0.0165-0.066ug/mL	Rabbit anti-Human IgM mAb(DET)(Cat. No.RMK0104)
Standard	0.31-20ng/mL	Recombinant Human IgM Protein

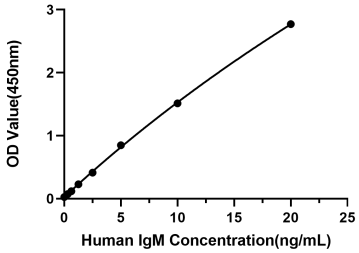

Validation Data

Placed at 37°C for 3 days, the stability of the standard curve all conformto CV <10%.

No significant cross-reactivity or interference was observed.

This standard curve is only for demonstration purposes. A standard curve should be generated for eachassay.
