Rabbit anti-Human GM-CSF mAb

Catalog No.: RMK0250

Basic Information

Catalog No.
RMK0250

Catagory
Elisa Antibody Kit

Application
Multiplex

Product Information

Ig Type
Rabbit IgG

Purification
Affinity purification

Endotoxin Level

Storage
Store at -20℃
Avoid repeated freeze-thaw cycles.

Formulation
Supplied as a 0.2μm filtered solution in PBS with 0.05% Proclin300, PH 7.4.

Background

The protein encoded by this gene is a cytokine that controls the production, differentiation, and function of granulocytes and macrophages. The active form of the protein is found extracellularly as a homodimer. This gene has been localized to a cluster of related genes at chromosome region 5q31, which is known to be associated with interstitial deletions in the 5q- syndrome and acute myelogenous leukemia. Other genes in the cluster include those encoding interleukins 4, 5, and 13. This gene plays a role in promoting tissue inflammation. Elevated levels of cytokines, including the one produced by this gene, have been detected in SARS-CoV-2 infected patients that develop acute respiratory distress syndrome. Mice deficient in this gene or its receptor develop pulmonary alveolar proteinosis.

Immunogen Information

Immunogen
Recombinant Human GM-CSF Protein

Cross-Reactivity

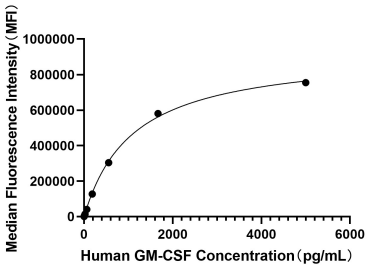

/

Assay Applications

Human GM-CSF Sandwich Immunoassay

		Recommended Concentration	Sample
Multiplex	Capture	3-20ug/mL	Rabbit anti-Human GM-CSF mAb(Cat. No.RMK0249)
	Detection	0.017-2ug/mL	Rabbit anti-Human GM-CSF mAb(Cat. No.RMK0250)
	Standard	6.86-5000pg/mL	Recombinant Human GM-CSF Protein

Validation Data

This standard curve is only for demonstration purposes. A standard curve should be generated for each assay.
