

Recombinant Human IL-33 Protein

Catalog No.: RP00019 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Human	90865	O95760

Tags

No tag

Synonyms

IL33;C9orf26;DVS27;IL1F11;NF-HEV;NFEHEV

Product Information

Source	Purification
<i>E. coli</i>	> 97% by SDS-PAGE.

Endotoxin

< 0.1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Interleukin 33 (IL-33), also known as DVS27 or NF-HEV (Nuclear Factor from High Endothelial enules), is a proinflammatory protein and a chromatin-associated cytokine of the IL-1 family with high sequence and structural similarity to IL-1 and IL-18. The encoded protein is involved in the maturation of Th2 cells and the activation of mast cells, basophils, eosinophils and natural killer cells.

Basic Information

Description

Recombinant Human IL-33 Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Ser112-Thr270) of human IL-33 (Accession #NP_001300973.1).

Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized Recombinant human IL33 at 10 μg/mL (100 μL/well) can bind Recombinant human IL1RL1 with a linear range of 37.8-151.4 ng/mL.

Storage

Store the lyophilized protein at -20°C to -80 °C for long term.

After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human IL-33 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 19 kDa.

Immobilized Recombinant human IL33 at 10 $\mu\text{g/mL}$ (100 μL /well) can bind Recombinant human IL1RL1 with a linear range of 37.8-151.4 ng/mL.
