

# Recombinant Human OX-2/CD200 Protein

Catalog No.: RP00127 **Recombinant**

## Sequence Information

<b>Species</b>	<b>Gene ID</b>	<b>Swiss Prot</b>
Human	4345	P41217

### Tags

C-His

### Synonyms

CD200;MOX1;MOX2;MRC;OX-2

## Product Information

<b>Source</b>	<b>Purification</b>
HEK293 cells	> 95% by SDS-PAGE.

<b>Calculated MW</b>	<b>Observed MW</b>
23.29 kDa	40-50 kDa

### Endotoxin

&lt; 0.1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize freeze-thaw cycles.

## Background

The protein is a type I membrane glycoprotein containing two extracellular immunoglobulin domains, a transmembrane and a cytoplasmic domain. This gene is expressed by various cell types, including B cells, a subset of T cells, thymocytes, endothelial cells, and neurons. The encoded protein plays an important role in immunosuppression and regulation of anti-tumor activity. Alternative splicing results in multiple transcript variants encoding different isoforms.

## Basic Information

### Description

Recombinant Human OX-2/CD200 Protein is produced by HEK293 expression system. The target protein is expressed with sequence (Gln31-Gly232) of human CD200/OX-2 (Accession #NP\_005935.4) fused with a 6×His tag at the C-terminus.

### Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized Human CD200 at 2 μg/mL (100 μL/well) can bind Human CD200R with a linear range of 0.058-8.34 ng/mL.

### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Human OX-2/CD200 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 39-50 kDa.

Immobilized Human CD200 at 2 $\mu$ g/mL (100  $\mu$ L/well) can bind Human CD200 R with a linear range of 0.058-8.34 ng/mL.
