

# Recombinant Human TACTILE/CD96 Protein

Catalog No.: RP00345 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
Human	10225	P40200-2

### Tags

C-His

### Synonyms

CD96 molecule; CD96; DKFZp667E2122; TACTILE

## Product Information

Source	Purification
HEK293 cells	≥ 95 % as determined by SDS-PAGE; ≥ 95 % as determined by HPLC.

Calculated MW	Observed MW
54.7 kDa	115-130 kDa

### Endotoxin

< 1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from 0.22 μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

The receptors CD96 and TIGIT are expressed on the surface of T and natural killer (NK) cells, and recent studies suggest both play important inhibitory roles in immune function. CD96 has been shown to modulate immune cell activity in mice, with Cd96<sup>-/-</sup> mice displaying hypersensitive NK-cell responses to immune challenge and significant tumor resistance. The counterbalance between the putative inhibitory CD96 and TIGIT receptors and the activating receptor, CD226, offers unique strategies for immuno-oncology drug development.

## Basic Information

### Description

Recombinant Human TACTILE/CD96 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Val22-Met503) of Human TACTILE/CD96 (Accession #P40200-2) fused with a C-His tag at the C-terminus.

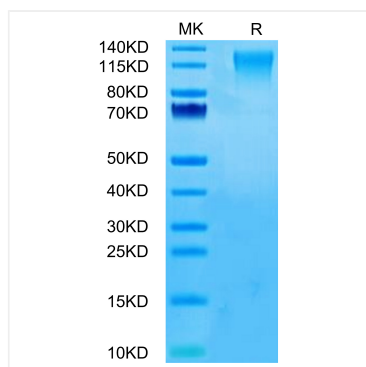

### Bio-Activity

### Storage

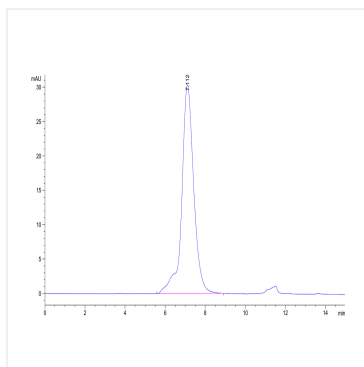

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

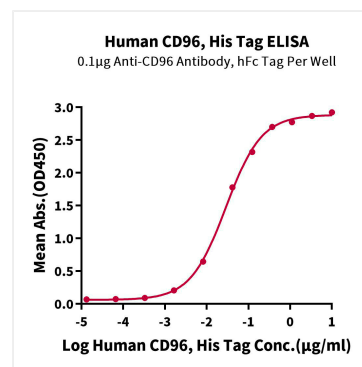

## Validation Data

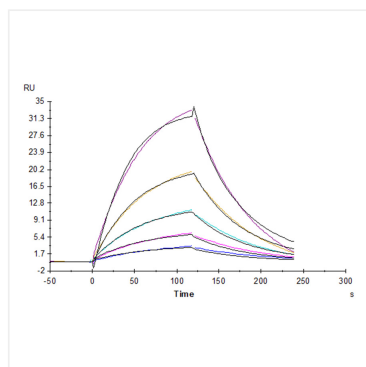

Recombinant Human TACTILE/CD96 Protein was determined by Tris-Bis PAGE under reducing conditions.

The purity of Human CD96 is greater than 95% as determined by SEC-HPLC.

Immobilized Anti-CD96 Antibody, hFc Tag at 1  $\mu\text{g/mL}$  (100  $\mu\text{L}$ /well) on the plate. Dose response curve for Human CD96, His Tag with the  $\text{EC}_{50}$  of 28.8ng/mL determined by ELISA (QC Test).

Human CD155, hFc Tag captured on CM5 Chip via Protein A can bind Human CD96, His Tag with an affinity constant of 0.958  $\mu\text{M}$  as determined in SPR assay (Biacore T200).
