This protein is a homolog of the *Drosophila* delta family. The delta family encodes Notch ligands that are characterized by a DSL domain, EGF repeats, and a transmembrane domain.

Recombinant Human DLL4 Protein is produced by Human Cell expression system. The target protein is expressed with sequence (Ser27-Pro524) of human DLL4 (Accession #Q9NR61) fused with a His tag at the C-terminus.

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.
