

Biotinylated Recombinant Human FGFR-3 alpha (IIIc)/CD333 Protein

Catalog No.: RP00466B Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 2261 P22607

Tags C-His&Avi

Synonyms

ACH; CD333; CEK; CEK2; EC 2.7.10; FGF R3; FGFR3; HSFGFR3EX; JTK4

Product Information

Source Purification HEK293 cells ≥ 95 % as

determined by SDS-PAGE;≥ 95 % as determined by HPLC.

Calculated MW Observed MW

41.1 kDa 65-75 kDa

Endotoxin

< 1 EU/ μg of the protein by LAL method.

Formulation

Lyophilized from 0.22 µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Four distinct genes encoding closely related FGF receptors, FGF R1-4, are known. All four genes for FGF Rs encode proteins with an N-terminal signal peptide, three immunoglobulin (Ig)-like domains, an acid?box region containing a run of acidic residues between the IgI and IgII domains, a transmembrane domain and the split tyrosine-kinase domain.FGFR3 is tyrosine-protein kinase that acts as cell-surface receptor for fibroblast growth factors and plays an essential role in the regulation of cell proliferation, differentiation and apoptosis. Plays an essential role in the regulation of chondrocyte differentiation, proliferation and apoptosis, and is required for normal skeleton development. Regulates both osteogenesis and postnatal bone mineralization by osteoblasts.

Basic Information

Description

Biotinylated Recombinant Human FGFR-3 alpha (IIIc)/CD333 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu23-Gly375) of Human FGFR3 alpha (IIIc) (Accession #P22607) fused with a C-His&Avi tag at the C-terminus.

Bio-Activity

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

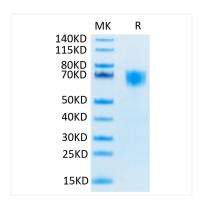

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

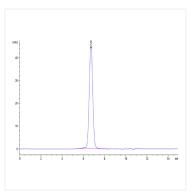

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

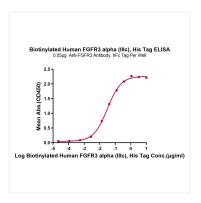

Validation Data

Biotinylated Recombinant Human FGFR-3 alpha (IIIc)/CD333 Protein was determined by Tris-Bis PAGE under reducing conditions.

The purity of Biotinylated Human FGFR3 alpha (IIIc) is greater than 95% as determined by SEC-HPLC.

Immobilized Anti-FGFR3 Antibody, hFc Tag at 0.5 μ g/mL (100 μ L/well) on the plate. Dose response curve for Biotinylated Human FGFR3 alpha (IIIc) , His Tag with the EC₅₀ of 31.2ng/mL determined by ELISA.
