

**Catalog No.: RP00990** **Recombinant**

Species	Gene ID	Swiss Prot
Human	929	P08571

## C-His

## CD14

<b>Source</b>	<b>Purification</b>
HEK293 cells	≥ 95 % as determined by SDS-PAGE

## 36.61 kDa                      45-55 kDa

< 0.1 EU/μg of the protein by LAL method.

Lyophilized from a 0.22  $\mu\text{m}$  filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Recombinant Human CD14 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Thr20-Cys352) of human CD14 (Accession #NP\_000582.1) fused with a 6×His tag at the C-terminus.

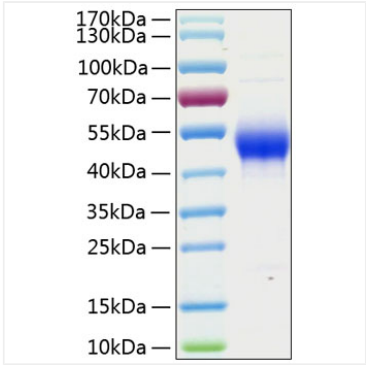

Measured by its ability to enhance LPS-stimulated IL-8 secretion by THP-1 human acute monocytic leukemia cells. The ED<sub>50</sub> for this effect is 5.7-23 ng/mL.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

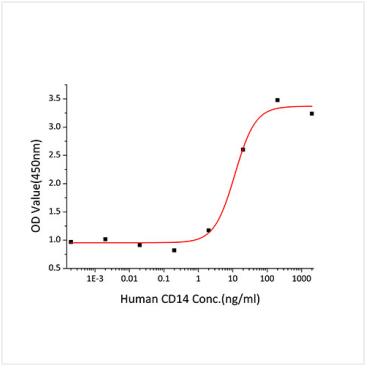

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

# Validation Data

Recombinant Human CD14 Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

Recombinant Human CD14 enhance LPS-stimulated IL-8 secretion by THP-1 human acute monocytic leukemia cells. The ED<sub>50</sub> for this effect is 5.7-23 ng/mL.
