

# Recombinant Human Tetranectin/CLEC3B Protein

Catalog No.: RP00991 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
Human	7123	P05452

### Tags

C-His

### Synonyms

CLEC3B;TN;TNA; TNA

## Product Information

Source	Purification
HEK293 cells	> 97% by SDS-PAGE.

Calculated MW	Observed MW
21.01 kDa	27 kDa

### Endotoxin

< 0.1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

### Basic Information

#### Description

Recombinant Human Tetranectin/CLEC3B Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu22-Val202) of human Tetranectin (Accession #NP\_003269.2) fused with a 6×His tag at the C-terminus.

#### Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized human HGF (Catalog: RP01602) at 5 μg/mL (100 μL/well) can bind human CLEC3B with a linear range of 0.05-5.91 μg/mL.

#### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Human Tetranectin/CLEC3B Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 27 kDa.
