

# Recombinant Human EGF Protein

Catalog No.: RP01030 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
Human	1950	P01133

### Tags

C-hFc&His

### Synonyms

EGF;HOMG4;URG

## Product Information

Source	Purification
HEK293 cells	> 90% by SDS-PAGE.

### Endotoxin

< 0.1 EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

Epidermal growth factor (EGF) is the founding member of the EGF family that also includes TGF-alpha, amphiregulin (AR), betacellulin (BTC), epiregulin (EPR), heparin binding EGF like growth factor (HB\_x005f)

## Basic Information

### Description

Recombinant Human EGF Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Asn 971-Arg 1023) of human EGF (Accession #NP\_001954.2) fused with hFc, 6×His tag at the C-terminus.

### Bio-Activity

1. Measured by its ability to stimulate EGF Receptor autophosphorylation in A431 cells. 1-10 ng/mL of Recombinant Human EGF can effectively enhance EGF Receptor autophosphorylation. 2. Measured by its binding ability in a functional ELISA. Immobilized Human EGFR at 5 μg/mL (100 μL/well) can bind Human EGF with a linear range of 7-25 ng/mL. 3. Measured in a cell proliferation assay using BALB/c 3T3 mouse embryonic fibroblasts. The ED<sub>50</sub> for this effect is typically 0.065-0.26 ng/mL, corresponding to a specific activity of 3.84×10<sup>6</sup>-1.54×10<sup>7</sup> units/mg.

### Storage

Store the lyophilized protein at -20°C to -80 °C for long term. After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

Recombinant Human EGF Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 40 kDa.

Recombinant Human EGF enhances EGF Receptor autophosphorylation in A431 cells. 1-10 ng/mL of Recombinant Human EGF can effectively enhance EGF Receptor autophosphorylation.

Immobilized Human EGFR at 5 μg/mL (100 μL/well) can bind Human EGF with a linear range of 7-25 ng/mL.

Recombinant Human EGF promotes the proliferation of BALB/c 3T3 mouse embryonic fibroblasts cells. The ED<sub>50</sub> for this effect is typically 0.065-0.26 ng/mL, corresponding to a specific activity of 3.84 × 10<sup>6</sup> - 1.54 × 10<sup>7</sup> units/mg.
