Recombinant Human IFN-gamma Protein

Catalog No.: RP01038 Recombinant 5 Publications

Sequence Information

Species Gene ID Swiss Prot Human 3458 P01579-1

Tags

No tag

Synonyms IFNG;IFG;IFI

Product Information

Source Purification

E. coli ≥ 95 % as
determined by SDS-

PAGE;≥ 95 % as determined by HPLC.

Calculated MW Observed MW

16.78 kDa 17 kDa

Endotoxin

< 0.1 EU/ μ g of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Interferon-gamma (IFN-gamma) is a secreted protein which belongs to the type II interferon family.Recombinant Human IFN-gamma is a 16.8 kDa protein containing 143 amino acid residues. IFN-gamma is produced by a variety of immune cells under inflammatory conditions, notably by T cells and NK cells. IFN-gamma, in addition to having antiviral activity, has important immunoregulatory functions. Interferon-gamma is a central regulator of the immune response and signals via the Janus Activated Kinase (JAK)-Signal Transducer and Activator of Transcription (STAT) pathway.

Basic Information

Description

Recombinant Human IFN-gamma Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Gln24-Gln166) of human Interferon Gamma (Accession #NP 000610.2).

Bio-Activity

1.Measured by its binding ability in a functional ELISA. Immobilized Human FNGR1/CD119 at 1 μ g/mL (100 μ L/well) can bind Human IFNG with a linear range of 0.98-1.97 ng/mL.|2.Measured in a cytotoxicity assay using HT-29 cells. The ED₅₀ for this effect is 0.74-2.96 ng/mL, corresponding to a specific activity of 3.38×10⁵~1.35×10⁶ units/mg. |3.Flow cytometry: 1X10⁶ A549 cells treated with IFN-γ (RP01038,1 ng/mL) were surface-stained with PE Rabbit IgG isotype control (A24172,5 μ l/Test,left) or PE Rabbit anti-Human PD-L1/CD274 mAb (A26692,5 μ l/Test,right).|4.Flow cytometry: 1X10⁶ NCI-H460 cells treated with IFN-γ (RP01038,1 ng/mL) were surface-stained with PE Rabbit IgG isotype control (A24172,5 μ l/Test,left) or PE Rabbit anti-Human PD-L1/CD274 mAb (A26692,5 μ l/Test,right)

Shipping

The product is shipped at ambient temperature. Upon receipt, store it immediately at the temperature recommended below.

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Operational Notes

For your safety and health, please wear a lab coat and disposable gloves for handling.

Validation Data

Recombinant Human IFN-gamma Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.

gamma Protein is greater than 95% as

OD214nm

Immobilized Human FNGR1/CD119 at 1 $\mu g/mL$ (100 $\mu L/well$) can bind Human IFNG with a linear range of 0.98-1.97ng/mL.

Recombinant Human IFN-gamma induces cytotoxicity in the HT-29 cells. The ED_{50} for this effect is 0.74-2.96 ng/mL, corresponding to a specific activity of $3.38 \times 10^5 \sim 1.35 \times 10^6$ units/mg.

Flow cytometry: 1X10⁶ A549 cells treated with IFN- γ (RP01038,1 ng/mL) were surfacestained with PE Rabbit IgG isotype control (A24172,5 µl/Test,left) or PE Rabbit anti-Human PD-L1/CD274 mAb (A26692,5 μl/Test,right)

Flow cytometry: 1X10⁶ NCI-H460 cells treated with IFN- γ (RP01038,1 ng/mL) were surface-stained with PE Rabbit IgG isotype control (A24172,5 µl/Test,left) or PE Rabbit anti-Human PD-L1/CD274 mAb (A26692,5 μl/Test,right)
