

Recombinant Human CD24 Protein

Catalog No.: RP01229 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Human	100133941	P25063

Tags

C-hFc

Synonyms

CD24;CD24A;CD24 molecule;CD247

Product Information

Source	Purification
HEK293 cells	> 97% by SDS-PAGE.

Endotoxin

< 0.1 EU/μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Basic Information

Description

Recombinant Human CD24 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Met1-Gly59) of human CD24 (Accession #NP_037362) fused with a Fc tag at the C-terminus.

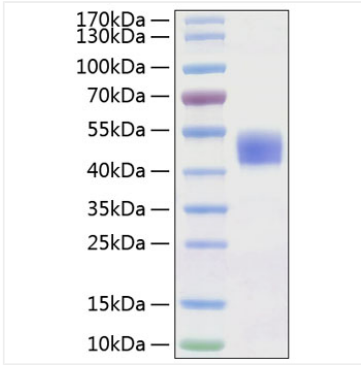

Bio-Activity

Measured by its binding ability in a functional ELISA. Immobilized Human CD24 at 2 μg/mL (100 μL/well) can bind Human Siglec10 with a linear range of 1-764 ng/mL. Measured by its binding ability in a functional ELISA. Immobilized PE Mouse Anti-Human CD24 at 1 μg/mL (25 μL/well) can bind Human CD24 with a linear range of 0.46-28.4 ng/mL.

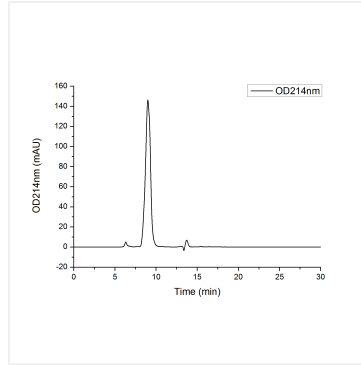

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

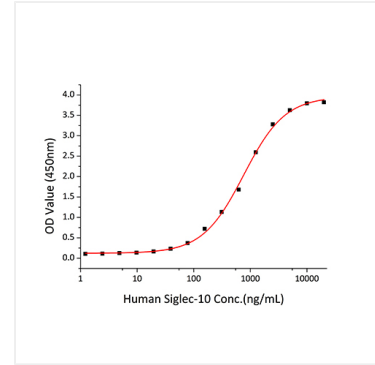

Validation Data

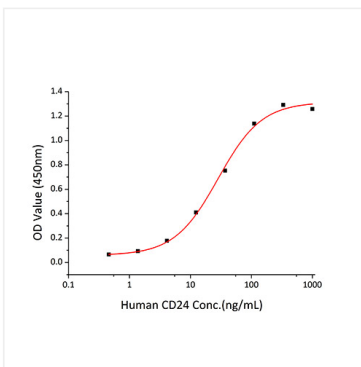

Active Recombinant Human CD24 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 40-50 kDa.

The purity of human CD24 Protein (Cat.RP01229) was greater than 95% as determined by SEC-HPLC.

Immobilized Human CD24 at 2 $\mu\text{g/mL}$ (100 $\mu\text{L/well}$) can bind Human Siglec10 with a linear range of 1-764 ng/mL.

Immobilized PE Mouse Anti-Human CD24 at 1 $\mu\text{g/mL}$ (25 $\mu\text{L/well}$) can bind Human CD24 with a linear range of 0.46-28.4ng/mL.
