# **Recombinant Mouse EphA2/ECK Protein**

Catalog No.: RP01472 Recombinant

# **Sequence Information**

**Species Gene ID Swiss Prot**Mouse 13836 003145

**Tags** C-His

Synonyms

Eck;Myk2;Sek2;Sek-2;AW545284;EphA2

## **Product Information**

Source Purification HEK293 cells > 95% by SDS-PAGE.

#### **Endotoxin**

< 1.0 EU/ $\mu$ g of the protein by LAL method.

#### **Formulation**

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

#### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## **Background**

Eph receptor A2 (Ephrin type-A receptor 2 or EphA2) is a member of the ephrin receptor subfamily of the protein-tyrosine kinase family. The receptor tyrosine kinase which binds promiscuously membrane-bound ephrin-A family ligands residing on adjacent cells, leading to contact-dependent bidirectional signaling into neighboring cells. The signaling pathway downstream of the receptor is referred to as forward signaling while the signaling pathway downstream of the ephrin ligand is referred to as reverse signaling. Activated by the ligand ephrin-A1/EFNA1 regulates migration, integrin-mediated adhesion, proliferation and differentiation of cells. Regulates cell adhesion and differentiation through DSG1/desmoglein-1 and inhibition of the ERK1/ERK2 (MAPK3/MAPK1, respectively) signaling pathway. May also participate in UV radiation-induced apoptosis and have a ligand-independent stimulatory effect on chemotactic cell migration.

#### **Basic Information**

#### **Description**

Recombinant Mouse EphA2/ECK Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Lys26-Asn535) of mouse EphA2/Sek2 (Accession #NP\_034269.2) fused with a 6×His tag at the C-terminus.

#### **Bio-Activity**

Measured by its binding ability in a functional ELISA. Immobilized Mouse EphA2 (Catalog: RP01472) at 2  $\mu$ g/mL (100  $\mu$ L/well) can bind Human EFNA1 (Catalog: RP01425) with a linear range of 0.3 -4.27 ng/mL.

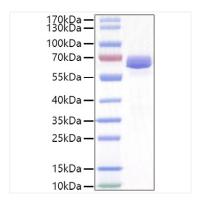

#### Storage

Store at  $-20^{\circ}$ C. Store the lyophilized protein at  $-20^{\circ}$ C to  $-80^{\circ}$ C up to 1 year from the date of receipt.

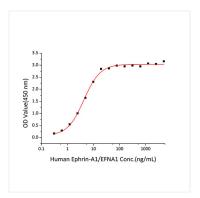

After reconstitution, the protein solution is stable at -20  $^{\circ}$ C for 3 months, at 2-8  $^{\circ}$ C for up to 1 week.

Avoid repeated freeze/thaw cycles.

# **Validation Data**

Recombinant Mouse EphA2/ECK Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 65-70kDa.

Immobilized Mouse EphA2 Protein at 2  $\mu$ g/mL (100  $\mu$ L/well) can bind Human EFNA1 with a linear range of 0.3 -4.27 ng/mL.
