

# Recombinant Mouse Clusterin/Apo-J/CLU Protein

Catalog No.: RP01604 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
Mouse	12759	Q06890

### Tags

C-His

### Synonyms

AAG4;APO-  
J;APOJ;CLI;CLU1;CLU2;KUB1;NA1/NA2;SG  
P-2;SGP2;SP-40;TRPM-2;TRPM2;CLU

## Product Information

Source	Purification
HEK293 cells	> 95% by SDS- PAGE.

### Endotoxin

<0.1EU/μg

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

The protein encoded by this gene is a secreted chaperone that can under some stress conditions also be found in the cell cytosol. It has been suggested to be involved in several basic biological events such as cell death, tumor progression, and neurodegenerative disorders. Alternate splicing results in both coding and non-coding variants.

## Basic Information

### Description

Recombinant Mouse Clusterin/Apo-J/CLU Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gly21-Glu448) of mouse Clusterin/Apo-J/CLU (Accession #NP\_038520.2) fused with and a 6×His tag at the C-terminus.

### Bio-Activity

#### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Mouse Clusterin/Apo-J/CLU Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 32-42-65 kDa.
