

# Recombinant Human Apolipoprotein A-IV/APOA4 Protein

Catalog No.: RP01854 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
Human	337	P06727

### Tags

C-His

### Synonyms

APOA4, Apolipoprotein A-IV; Apo-AIV; ApoA-IV; Apolipoprotein A4.

## Product Information

Source	Purification
HEK293 cells	

### Endotoxin

<0.01EU/μg of the protein by LAL method.

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

### Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

Apolipoprotein A-IV (ApoA-IV), first discovered in rat plasma in the 1970s, is a 46 kD glycoprotein with relatively high concentrations in plasma (15–37 mg/dL). It is expressed predominantly in the mammalian small intestine (with highest expression in the duodenum), and also expressed in rodent liver at lower levels. Sensing lipid absorption in enterocytes, ApoA-IV is synthesized and packaged with lipids and other apolipoproteins into chylomicrons and secreted through the lymphatic system into the blood. Once there, as a member of exchangeable apolipoproteins, ApoA-IV dissociates from chylomicrons and transfers to HDL (high density lipoprotein) particles or circulates in lipid-free form. ApoA-IV may protect against atherosclerosis, mediate reverse cholesterol transport, act as an anti-inflammatory agent and modulate intestinal lipid absorption.

## Basic Information

### Description

Recombinant Human Apolipoprotein A-IV/APOA4 Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Glu21-Ser396) of Human Apolipoprotein A-IV/APOA4 (Accession #NP\_000473.2) fused with a His tag at the C-terminus.

### Bio-Activity

### Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week. Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Human Apolipoprotein A-IV/APOA4 Protein was determined by SDS-PAGE with Coomassie Blue, showing bands at 45-55 kDa.
