

Biotinylated Recombinant Human FGFR-4/CD334 Protein

Catalog No.: RP02357B Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 2264 P22455

Tags C-His&Avi

Synonyms

CD334; JTK2; TKF; FGFR4; JTK2; TKF

Product Information

Source Purification HEK293 cells > 95% by Tris-Bis

PAGE;> 95% by SEC-HPLC

SEC-HPLO

Endotoxin

< 1 EU/ μg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Fibroblast growth factor receptor 4 (FGF R4), also known as CD334, is a 110 kDa glycosylated transmembrane receptor tyrosine kinase. Tyrosine-protein kinase that acts as cell-surface receptor for fibroblast growth factors and plays a role in the regulation of cell proliferation, differentiation and migration, and in regulation of lipid metabolism, bile acid biosynthesis, glucose uptake, vitamin D metabolism and phosphate homeostasis. Required for normal down-regulation of the expression of CYP7A1, the rate-limiting enzyme in bile acid synthesis, in response to FGF19.

Basic Information

Description

Biotinylated Recombinant Human FGFR-4/CD334 Protein is produced by Expi293 expression system. The target protein is expressed with sequence (Leu22-Asp369) of Human FGFR4 fused with a His tag and Avi tag at the C-terminal.

Bio-Activity

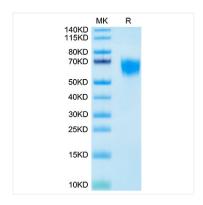

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80°C up to 1 year from the date of receipt.

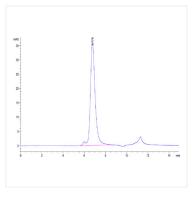

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Biotinylated Human FGFR4 on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

The purity of Biotinylated Human FGFR4 is greater than 95% as determined by SEC-HPI C.
