

**Catalog No.: RP02689** **Recombinant**

Species	Gene ID	Swiss Prot
Cynomolgus		G8F4W7

## C-His&amp;Avi

Ig epsilon chain C region-IgE

<b>Source</b> HEK293 cells	<b>Purification</b> ≥ 95 % as determined by Tris- Bis PAGE; ≥ 95 % as determined by HPLC.
-------------------------------	--

Calculated MW	Observed MW
27.9 kDa	35-40 kDa

< 1 EU/μg of the protein by LAL method.

## Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Immunoglobulin E (IgE) is well known for its role in allergic disease, the manifestations of which are mediated through its two Fc receptors, FcεRI and CD23 (FcεRII). IgE and its interactions with these receptors are therefore potential targets for therapeutic intervention, and exciting progress has been made in this direction. Furthermore, recent structural studies of IgE-Fc, the two receptors, and of their complexes, have revealed a remarkable degree of plasticity at the IgE-CD23 interface and an even more remarkable degree of dynamic flexibility within the IgE molecule.

Recombinant Cynomolgus IgE Protein is expressed from Expi293 with His tag and Avi tag at the C-terminal. It contains Cys208-Lys429.

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.  
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.  
Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Cynomolgus IgE Protein was determined by Tris-Bis PAGE under reducing conditions.

The purity of Cynomolgus IgE is greater than 95% as determined by SEC-HPLC.

Immobilized Cynomolgus IgE, His Tag at 1µg/ml (100µl/well) on the plate. Dose response curve for Anti-IgE Antibody, hFc Tag with the EC<sub>50</sub> of 9.3ng/ml determined by ELISA.
