Recombinant Human Notch 3 Protein

Catalog No.: RP02707 Recombinant

Sequence Information

Species	Gene ID	Swiss Prot
Human	4854	O9UM47

Tags

C-His&Avi

Synonyms

CADASIL; Notch homolog 3; Notch-3; NOTCH3

Product Information

Source	Purification
HEK293 cells	≥ 95 % as determined by Tris-
	Bis PAGE;≥ 95 % as determined by HPLC.
Calculated MW	Observed MW

47.7 kDa 53-60 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Reconstitution

Centrifuge the tube before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Human Notch-3 is part of the Notch family of type I transmembrane glycoproteins involved in a number of early-event developmental processes. The extracellular domain of Notch receptors interact with the extracellular domain of transmembrane ligands Jagged, Delta, and Serrate expressed on the surface of a neighboring cell. Upon ligand activation through the released notch intracellular domain (NICD) it forms a transcriptional activator complex with RBPJ/RBPSUH and activates genes of the enhancer of split locus. Affects the implementation of differentiation, proliferation and apoptotic programs

Basic Information

Description

Recombinant Human Notch 3 Protein is expressed from Expi293 with His tag and Avi tag at the C-terminal. It contains Ala40-Glu467.

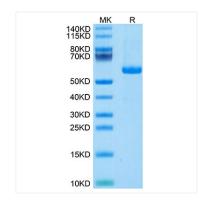

Bio-Activity

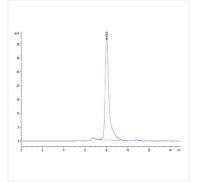

Storage

Store at -20°C.Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Recombinant Human Notch 3 Protein was determined by Tris-Bis PAGE under reducing conditions.

The purity of Human Notch 3 is greater than 95% as determined by SEC-HPLC.
