

Recombinant Human Lactotransferrin/LTF Protein

Catalog No.: RP02797 **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Human	4057	P02788

Tags

C-His

Synonyms

Lactoferrin; Talalactoferrin; Kaliocin-1;
Lactoferroxin-A; Lactoferroxin-B;
Lactoferroxin-C; LTF; LF

Product Information

Source	Purification
HEK293 cells	> 97% by SDS-PAGE.

Calculated MW	Observed MW
77.01 kDa	75-100 kDa

Endotoxin

<0.1EU/μg

Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

Reconstitution

Centrifuge the tube before opening.
Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Lactotransferrin is a member of the transferrin family that transfer iron to the cells and control the level of free iron in the blood and external secretions. Lactotransferrin is a secreted protein and contains two transferrin-like domains. Lactotransferrin can be cleaved into the following four chains: Kaliocin-1, Lactoferroxin-A, Lactoferroxin-B, and Lactoferroxin-C. Lactoferroxin A, Lactoferroxin B, and Lactoferroxin C have opioid antagonist activity. Lactoferroxin A shows preference for mu-receptors, while Lactoferroxin B and Lactoferroxin C have somewhat higher degrees of preference for kappa-receptors than for mu-receptors. LTF has antimicrobial activity (bactericide, fungicide) and is part of the innate defense, mainly at mucoses.

Basic Information

Description

Recombinant Human Lactotransferrin/LTF Protein is produced by HEK293 cells expression system. The target protein is expressed with sequence (Gly20-Lys710) of human Lactotransferrin (Accession #AAH15822.1) fused with a 6×His tag at the C-terminus.

Bio-Activity

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.
After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human Lactotransferrin Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 75-100 kDa.
