

Recombinant Human PMKase/PMVK Protein

Catalog No.: RP02879LQ **Recombinant**

Sequence Information

Species	Gene ID	Swiss Prot
Human	10654	Q15126

Tags

N-His

Synonyms

PMVK;HUMPMKI;PMK;PMKA;PMKASE;POR
OK1

Product Information

Source	Purification
<i>E. coli</i>	> 95% as determined by SDS-PAGE.

Calculated MW	Observed MW
24.2 kDa	26 kDa

Endotoxin

<1EU/μg

Formulation

Supplied as a 0.2 μm filtered solution of 20mM Tris-HCl, 100mM NaCl, 1mM DTT, 10% Glycerol, pH 7.5.

Background

Phosphomevalonate kinase (PMVK) is a cytosolic enzyme. PMVK can be highly expressed in the heart, skeletal muscle, liver, pancreas, and kidney; it is expressed at lower levels in the brain, lung, and placenta. Induced by sterol, PMVK takes part in isopentenyl diphosphate biosynthesis through the mevalonate pathway. PMVK catalyzes the conversion of mevalonate 5-phosphate into mevalonate 5-diphosphate in the fifth reaction of the cholesterol biosynthetic pathway.

Basic Information

Description

Recombinant Human PMKase/PMVK Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Met1-Leu192) of human PMKase/PMVK (Accession #NP_006547.1) fused with a 6×His tag at the N-terminus.

Bio-Activity

Storage

Store at -70°C. This product is stable at ≤ -70°C for up to 1 year from the date of receipt. For optimal storage, aliquot into smaller quantities after centrifugation and store at recommended temperature. Avoid repeated freeze-thaw cycles. Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human PMKase/PMVK Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 26 kDa.
