

# Recombinant Human Neutral ceramidase/ASAH2 Protein

**Catalog No.:** RP02932 **Recombinant**

## Sequence Information

Species	Gene ID	Swiss Prot
Human	54447	Q9JHE3

### Tags

N-His

### Synonyms

Neutral ceramidase; N-CDase; NCDase

## Product Information

Source	Purification
HEK293 Cells	> 97% by SDS-PAGE.

**Calculated MW**   **Observed MW**

### Endotoxin

&lt;1EU/μg

### Formulation

Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.

### Reconstitution

Centrifuge the vial before opening.  
Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

## Background

ASAH2 (N-acylsphingosine amidohydrolase 2), also known as neutral ceramidase, is a type II integral membrane protein that can be cleaved to produce a soluble secreted protein. The enzyme is abundant in the brush border membranes of the intestine, and also expressed in several tissues such as kidney, brain and liver. The primary structure of ASAH2/neutral ceramidase is highly conserved from bacteria to humans, however, there is a clear difference in the molecular architecture. The murine ASAH2 possesses 'amucin box', a Ser/Thr/Pro-rich domain glycosylated with O-glycans which is necessary to retain the enzyme on the plasma membrane as a type II integral protein. The major physiological function of ASAH2/neutral ceramidase is the metabolism of dietary sphingolipids, and thus plays a role in the generation of messenger molecules such as sphingosine and sphingosine 1-phosphate.

## Basic Information

### Description

Recombinant Human Neutral ceramidase/ASAH2 Protein is produced by HEK293 Cells expression system. The target protein is expressed with sequence (Thr34-Thr756) of human Neutral ceramidase/ASAH2 (Accession #NP\_061300.1) fused with and a 6×His tag at the N-terminus.

### Bio-Activity

### Storage

Store the lyophilized protein at -20°C to -80°C for long term.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

## Validation Data

---

Recombinant Human Neutral ceramidase/ASAH2 Protein was determined by SDS-PAGE with Coomassie Blue, showing a band at 105-115 kDa.
