Recombinant Human NF-L/NEFL Protein

ABclonal

www.abclonal.com

Catalog No.: RP03173 Recombinant

Sequence Information

Species Gene ID Swiss Prot Human 4747 P07196

Tags N-His

Synonyms

NEFL;CMT1F;CMT2E;NF-L;NF68;NFL;PPP1R110

Product Information

Source Purification *E. coli* \geq 95 % as

determined by SDS-PAGE.

Calculated MW Observed MW

63.4 kDa

Endotoxin

< 1 EU/µg of the protein by LAL method.

Formulation

Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4. Contact us for customized product form or formulation.

Reconstitution

Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.

Background

Neurofilaments usually contain three intermediate filament proteins: NEFL, NEFM, and NEFH which are involved in the maintenance of neuronal caliber. May additionally cooperate with the neuronal intermediate filament proteins PRPH and INA to form neuronal filamentous networks (By similarity).

Basic Information

Description

Recombinant Human NF-L/NEFL Protein is produced by *E. coli* expression system. The target protein is expressed with sequence (Ser2-Asp543) of human NF-L/NEFL (Accession #NP 006149.2) fused with a 6×His tag at the N-terminus.

Bio-Activity

Immobilized Human NFL, His Tag (Cat. No. RP03173) at 1 μ g/mL (100 μ L/well) can bind Anti NEFL Antibody with a linear range of 0.002-0.063 μ g/mL (QC tested).

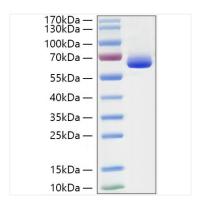

Storage

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.

After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.

Avoid repeated freeze/thaw cycles.

Validation Data

Recombinant Human NF-L/NEFL Protein was determined by SDS-PAGE under reducing conditions with Coomassie Blue.
